

Remote and Receiver

If you have the following Remote or Receiver they have been replaced by a New Style Remote-Receiver System.

Remote:
111441-02
FRC # 0.584.004

Receiver:
111442-02
FRC # 0.584.211

You will need to order new remote system, you must order all 3 items for the new system to connect properly.

Remote:
121129-01

Receiver:
121129-05

Wiring Harness
121129-04

Works with 4 prong plug wires only: wire colors are brown/yellow/orange/black. Be sure to check the wiring connections from the stepper motor to the receiver, the stepper motor should plug directly into the receiver with a 4 pin plug.

If your stepper motor uses a Red plug with Gray ribbon wire see Note below.

The 121129-01 Remote has the same features as the old style, adjustable flame height, and timer and temperature control.

NOTE:

If your Stepper motor uses this style plug, you will need to replace the stepper motor for the proper connection to the new wiring harness.

STOP
If your receiver has this style plug you have to replace the stepper motor on the gas valve.
